

Cambridge International AS & A Level

CHEMISTRY 9701/34

Paper 3 Advanced Practical Skills 2

May/June 2025

CONFIDENTIAL INSTRUCTIONS

This document gives details of how to prepare for and administer the practical exam.

The information in this document and the identity of any materials supplied by Cambridge International are confidential and must NOT reach candidates either directly or indirectly.

The supervisor must complete the report at the end of this document and return it with the scripts.

INSTRUCTIONS

• If you have any queries regarding these confidential instructions, contact Cambridge International stating the centre number, the syllabus and component number and the nature of the query.

email info@cambridgeinternational.org

phone +44 1223 553554

General information about practical exams

Centres must follow the guidance on science practical exams given in the Cambridge Handbook.

Safety

Supervisors must follow national and local regulations relating to safety and first aid.

Only those procedures described in the question paper should be attempted.

Supervisors must inform candidates that materials and apparatus used in the exam should be treated with caution. Suitable eye protection should be used where necessary.

The following hazard codes are used in these confidential instructions, where relevant:

C corrosive
 HH health hazard
 F flammable
 MH moderate hazard
 T acutely toxic
 O oxidising

N hazardous to the aquatic environment

Hazard data sheets relating to substances used in this exam should be available from your chemical supplier.

Before the exam

- The packets containing the question papers must **not** be opened before the exam.
- It is assumed that standard school laboratory facilities, as indicated in the *Guide to Planning Practical Science*, will be available.
- Spare materials and apparatus for the tasks set must be available for candidates, if required.

During the exam

- It must be made clear to candidates at the start of the exam that they may request spare materials and apparatus for the tasks set.
- Where specified, the supervisor must perform the experiments and record the results as instructed.
 This must be done out of sight of the candidates, using the same materials and apparatus as the candidates.
- Any assistance provided to candidates must be recorded in the supervisor's report.
- If any materials or apparatus need to be replaced, for example, in the event of breakage or loss, this must be recorded in the supervisor's report.

After the exam

- The supervisor must complete a report for each practical session held and each laboratory used.
- Each packet of scripts returned to Cambridge International must contain the following items:
 - the scripts of the candidates specified on the bar code label provided
 - the supervisor's results relevant to these candidates
 - the supervisor's reports relevant to these candidates
 - seating plans for each practical session, referring to each candidate by candidate number
 - the attendance register.

Specific information for this practical exam

During the exam, the supervisor (**not** the invigilator) must do all the experiments and record the results on a spare copy of the question paper, clearly labelled 'supervisor's results'.

If chemicals are prepared in more than one batch, clearly labelled supervisor's results must be provided for each batch. The candidates using each batch must be listed on the supervisor's report.

Apparatus

The apparatus listed must be provided to each candidate.

- 1 × 10 cm³ pipette
- 1 × 25 cm³ pipette
- 1 × pipette filler
- $2 \times 50 \, \text{cm}^3$ burette
- $2 \times 150 \, \text{cm}^3 \text{ or } 250 \, \text{cm}^3 \text{ conical flask}$
- $1 \times 25 \, \text{cm}^3$ measuring cylinder
- 2 × burette stand and clamp
- $1 \times 100 \, \text{cm}^3 \, \text{beaker}$
- $1 \times 250 \, \text{cm}^3 \text{ beaker}$
- 1 × funnel (for filling burette)
- 1 × white tile
- $1 \times \text{thermometer } (-10 \,^{\circ}\text{C to } +110 \,^{\circ}\text{C at } 1 \,^{\circ}\text{C})$
- 1 × plastic or cardboard cup, capacity approximately 150 cm³
- 1 × glass rod
- 2 × teat/dropping pipette
- 1 × spatula
- 1 × Bunsen burner
- 1 × heat-proof mat
- 1 × test-tube holder
- 1 × boiling tube
- 8 × test-tube *
- 1 × test-tube rack
- 1 × wash bottle containing distilled water
- 1 × pen for labelling glassware

paper towels

red and blue litmus papers

aluminium foil

wooden splints

the apparatus normally used in the centre for use with limewater in testing for carbon dioxide

* Candidates are expected to rinse and reuse test-tubes where possible. Additional test-tubes should be available.

Characterials

Characterials listed in the table must be provided to each candidate. Materials must be labelled only as specified in the 'label' column. The constitutions in the question paper. Candidates must independ an in the question paper. Candidates constitutes of chemicals labelled with letter codes, e.g. FB 1, may be different from their descriptions in the question paper. For example, candidates may be supplied with sulfuric acid, labelled as FB 1, but be told in the question paper that FB 1 is phosphoric acid.

label candidate	FB 1 120 cm ³	FB 2 120 cm ³	FB 3 [MH] 50 cm ³	FB 4 [C] 100 cm ³	FB 5 60 cm ³	FB 6 [MH] 10 cm ³	FB 7 [C] 10 cm ³	FB 8 10 cm ³	FB 9 [MH] 1g	iron(II) sulfate 10 cm ³
identity	3 0.0500 mol dm ⁻³ iron(II) sulfate with dilute sulfuric acid	3 0.0100 mol dm ⁻³ potassium manganate(VII) with dilute sulfuric acid	1.00 moldm ⁻³ sulfuric acid	3 1.00 mol dm ⁻³ sodium hydroxide	2.00 moldm ⁻³ hydrochloric acid	2.00 mol dm ⁻³ ethanoic acid	1.00 mol dm ⁻³ sodium hydroxide	10 vol hydrogen peroxide	0.5g of anhydrous sodium carbonate + 0.5g of ammonium bromide	0.2 moldm ⁻³ iron(II) sulfate with dilute sulfuric acid
notes	Dissolve 13.89 \pm 0.02g of FeSO ₄ •7H ₂ O [MH] in approximately 200 cm ³ of 1.0 moldm ⁻³ sulfuric acid. Make up to 1.0 dm ³ using distilled water. Provide in a stoppered container. This solution should be prepared as near to the time of the exam as possible.	Dissolve 1.58 \pm 0.02 g of KMnO ₄ [O][MH][HH][N] in approximately 200 cm ³ of 1.0 moldm ⁻³ sulfuric acid. Make up to 1.0 dm ³ using distilled water.	See preparation instructions in the current syllabus.	See preparation instructions in the current syllabus.	See preparation instructions in the current syllabus.	Use 120g of glacial ethanoic acid [C][F] diluted to 1.0 dm³. Supply in a stoppered container.	Same solution as FB 4 .	Dilute $100\mathrm{cm}^3$ of $100\mathrm{vol}\ H_2O_2$ [C] in each dm^3 of solution or dilute $500\mathrm{cm}^3$ of $20\mathrm{vol}\ H_2O_2$ [MH] in each dm^3 of solution. Supply in a stoppered container.	Mix together 0.5 ± 0.1 g of Na ₂ CO ₃ [MH] and 0.5 ± 0.1 g of NH ₄ Br [MH] . Alternatively use 0.5 g of (NH ₄) ₂ CO ₃ [MH] mixed with 0.5 g of KBr. Provide in a stoppered container.	Dissolve 55.6g of FeSO ₄ •7H ₂ O [MH] in approximately 200 cm ³ of 1.0 mol dm ⁻³ sulfuric acid. Make up to 1.0 dm ³ using distilled water. Provide in a stoppered container.

label	per candidate	identity	notes
manganese(IV) oxide [MH]	0.5g	solid manganese(IV) oxide	Provide $0.5g \pm 0.1g$ of powdered MnO ₂ [MH] in a stoppered container.
magnesium [F]	2 × 1 cm length	magnesium ribbon	Provide two pieces of magnesium ribbon [F] each 1 cm length. The ribbon should be lightly sanded before cutting. Plenty of spare strips should be available in reserve.
aqueous chlorine [C][N]	5 cm ³	aqueous sodium chlorate(I)	Prepare by diluting domestic/commercial bleach [C][N] with an equal volume of water. Check the concentration is suitable by ensuring the solution decolourises litmus paper. May be supplied as sodium hypochlorite. Provide in a stoppered container.
distilled water	50 cm ³	distilled water	

The list of materials continues on the next page.

label	per candidate	identity	notes
dilute hydrochloric acid	10 cm ³	2.0 moldm ⁻³ HC <i>l</i>	
dilute nitric acid [C]	10 cm ³	2.0 moldm ⁻³ HNO ₃	
dilute sulfuric acid [MH]	10 cm ³	1.0 moldm ⁻³ H ₂ SO ₄	see preparation instructions in the current syllabus.
aqueous ammonia [C][MH][N]	10 cm ³	2.0 moldm ⁻³ NH ₃	4 9 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0
aqueous sodium hydroxide [C]	20 cm ³	2.0 mol dm ⁻³ NaOH	reagents can be provided as a
aqueous barium chloride or	10 cm ³	$0.1\mathrm{moldm^{-3}BaC}l_2$ or	communal supply for groups of up to 6 candidates.
aqueous barium nitrate		$0.1 \mathrm{moldm^{-3}Ba(NO_3)_2}$	1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
limewater [MH]	10 cm ³	saturated aqueous calcium hydroxide, Ca(OH) ₂	Invigilators must be alert to the risk of contamination and the opportunity for malpractice when
aqueous silver nitrate	10 cm ³	$0.05\mathrm{moldm^{-3}AgNO_3}$	using a communal supply.
acidified aqueous potassium manganate(VII) [MH]	10 cm ³	$0.01 \mathrm{moldm}^{-3} \mathrm{KMnO_4}$ in $0.5 \mathrm{moldm}^{-3} \mathrm{H_2SO_4}$	

An excess of at least 10% of each material must be prepared to cover accidental loss.

All solutions must be thoroughly mixed.

as possible far If you are unable to source any of these chemicals, you must contact Cambridge International as advance of the exam for advice.

Supervisor's report

Syllabus and component number			/		
Centre number					
Centre name	 	 		 	
Time of the practical session	 	 		 	
Laboratory name/number	 	 		 	

Give details of any difficulties experienced by the centre or by candidates (include the relevant candidate names and candidate numbers).

You must include:

- any difficulties experienced by the centre in the preparation of materials
- any difficulties experienced by candidates, e.g. due to faulty materials or apparatus
- any specific assistance given to candidates.

If chemicals have been prepared in more than one batch, list the candidates using each bat	S nave been prepared in more than one t	Daten, not the	e canuluales	using ea	icii balci

Declaration

- 1 Each packet that I am returning to Cambridge International contains all of the following items:
 - the scripts of the candidates specified on the bar code label provided
 - the supervisor's results relevant to these candidates
 - the supervisor's reports relevant to these candidates
 - seating plans for each practical session, referring to each candidate by candidate number
 - the attendance register.
- 2 Where the practical exam has taken place in more than one practical session, I have clearly labelled the supervisor's results, supervisor's reports and seating plans with the time and laboratory name/number for each practical session.
- 3 I have included details of difficulties relating to each practical session experienced by the centre or by candidates.
- 4 I have reported any other adverse circumstances affecting candidates, e.g. illness, bereavement or temporary injury, directly to Cambridge International on a *special consideration form*.

Signed	. (supervisor)
