

Cambridge International AS & A Level

BUSINESS**9609/23**

Paper 2 Business Concepts 2

May/June 2025**MARK SCHEME**Maximum Mark: 60

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2025 series for most Cambridge IGCSE, Cambridge International A and AS Level components, and some Cambridge O Level components.

This document consists of **32** printed pages.

PUBLISHED**Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptions for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

PUBLISHED**Social Science-Specific Marking Principles
(for point-based marking)****1 Components using point-based marking:**

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a** DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- b** DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- c** DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require n reasons (e.g. State two reasons ...).
- d** DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e** DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f** DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g** DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)

2 Presentation of mark scheme:

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

3 Calculation questions:

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

4 Annotation:

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

Annotations guidance for centres

Examiners use a system of annotations as a shorthand for communicating their marking decisions to one another. Examiners are trained during the standardisation process on how and when to use annotations. The purpose of annotations is to inform the standardisation and monitoring processes and guide the supervising examiners when they are checking the work of examiners within their team. The meaning of annotations and how they are used is specific to each component and is understood by all examiners who mark the component.

We publish annotations in our mark schemes to help centres understand the annotations they may see on copies of scripts. Note that there may not be a direct correlation between the number of annotations on a script and the mark awarded. Similarly, the use of an annotation may not be an indication of the quality of the response.

The annotations listed below were available to examiners marking this component in this series.

Annotations

Annotation	Meaning
	For objective points that are right or wrong.
	For objective points that are wrong.
	When there is a misunderstanding in a response.
	When the candidate has attempted something, but the mark/skill has not been awarded.
Highlighter Or Underline	To highlight a point or section of an answer that justifies the mark/annotation.
	When the candidate has attempted something, and the mark/skill has been awarded.
On page comment	To communicate with the supervisor.
	When the context has not been used.

PUBLISHED

Annotation	Meaning
SEEN	To show a page/section has been seen/read.
NAQ	When the response is not focussed on answering the question.
REP	The repetition of a previous point in a response or candidate is copying the case study/data.
OFR	The own figure rule applies – acts as a mark/tick.
K	When AO1 has been awarded. Number of Ks should match the mark awarded.
APP	When AO2 has been awarded. Number of APPs should match the mark awarded.
AN	When AO3 at Level 1 has been awarded.
DEV	When AO3 at Level 2 has been awarded.
EVAL	When AO4 at Level 1 has been awarded.
E	When AO4 at Level 2 has been awarded.
EE	When AO4 at Level 3 has been awarded.

Guidance on using levels-based marking

Marking of work should be positive, rewarding achievement where possible, but clearly differentiating across the whole range of marks, where appropriate.

The examiner should look at the work and then make a judgement about which level statement is the best fit. In practice, work does not always match one level statement precisely so a judgement may need to be made between two or more level statements.

Once a best-fit level statement has been identified, use the following guidance to decide on a specific mark:

- If the candidate's work **convincingly** meets the level statement, award the highest mark.
- If the candidate's work **adequately** meets the level statement, award the most appropriate mark in the middle of the range.
- If the candidate's work **just** meets the level statement, award the lowest mark.
- L1, L2 etc. must be clearly annotated on the response at the point where the level is achieved.

Assessment objectives**AO1 Knowledge and understanding**

Demonstrate knowledge and understanding of business concepts, terms and theories.

AO2 Application

Apply knowledge and understanding of business concepts, terms and theories to problems and issues in a variety of familiar and unfamiliar business situations and contexts.

AO3 Analysis

Analyse business problems, issues and situations by:

- using appropriate methods and techniques to make sense of qualitative and quantitative business information
- searching for causes, impact and consequences
- distinguishing between factual evidence and opinion or value judgement
- drawing valid inferences and making valid generalisations.

AO4 Evaluation

Evaluate evidence in order to make reasoned judgements, present substantiated conclusions and, where appropriate, make recommendations for action and implementation.

PREPARATION FOR MARKING

- 1 Make sure that you have completed the relevant training and have access to the *RM Assessor Guide*.
- 2 Make sure that you have read and understand the question paper, which you can download from <https://support.rm.com/ca>
- 3 Log in to RM Assessor then mark and submit the required number of practice and standardisation scripts. You will need to mark the standardisation scripts to the required accuracy in order to be approved for marking live scripts. You may be asked to re-mark them, or to mark a second sample, if you do not meet the required accuracy on your first attempt.

MARKING PROCESS

- 1 Mark strictly to the FINAL mark scheme, applying the criteria consistently and the general marking principles outlined on the previous page.
- 2 If you are in doubt about applying the mark scheme, consult your Team Leader.
- 3 Mark at a steady rate through the marking period. Do not rush, and do not leave too much until the end. If you anticipate a problem in meeting the deadline, contact your Team Leader immediately and the Examiners' Helpdesk.
- 4 Examiners will prepare a brief report on the performance of candidates to send to their Team Leader via email by the end of the marking period. The Examiner should note strengths seen in answers and common errors or weaknesses. Constructive comments on the question paper, mark scheme or procedures are also appreciated.

MARKING SPECIFICS**Crossed out work**

- 1 **All** a candidate's answers, ***crossed out or not, optional or not, must be marked.***
- 2 The only response not to be marked is one that has been crossed out and replaced by another response for that exact same question.
- 3 Consequently, if a candidate has crossed out their response to an optional question and gone on to answer a different optional question then both attempts must be marked. The higher mark will be awarded by the system according to the rubric.

0 (zero) marks or NR (no response)

- 1 Award **NR** if there is nothing at all written in answer to that question (often the case for optional questions).
- 2 Award **NR** if there is a comment which is not an attempt at the question (e.g. 'can't do it' or 'don't know' etc.)
- 3 Award **NR** if there is a symbol which is not an attempt at the question, such as a dash or question mark.
- 4 Award **0** (zero) if there is any attempt at the question which does not score marks. This includes copying the question onto an Answer Booklet.

Question	Answer	Marks
2(d)	<p>Indicative content</p> <p>AO1 Knowledge and understanding</p> <p><i>Knowledge of business growth/methods of business growth/objectives (max 2 Ks), including:</i></p> <ul style="list-style-type: none"> • The process of improving some measure of an enterprise's success. • Can be achieved through various strategies • The increase in the size, revenue, market share, or profitability of a business over time. • Can be measured in different ways • External/internal growth • Organic growth • Mergers / joint ventures • Strategic alliance <p>Objectives</p> <ul style="list-style-type: none"> • Business objectives are specific, measurable goals that an organisation aims to achieve within a certain timeframe • Provide direction and a clear focus for the company's efforts and resources. • Guide decision-making • Help allocate resources effectively • Used to measure the success of various initiatives. <p>AO2 Application</p> <p><i>Limited application APP applies knowledge of growth/methods of business growth to FF once. Developed application APP + APP applies knowledge of growth/methods of business growth to FF twice</i></p> <ul style="list-style-type: none"> • Limited production capacity • High level of demand • Labour-intensive • Ethical approach – organic methods / renewable energy sources • Highly competitive market • Impacted by weather conditions • Affected by pests, diseases and natural disasters <p>Expectations of customers for fresh, varied and consistent products/quality, flavour and nutrition</p>	12

Question	Answer	Marks
2(d)	<p>AO3 Analysis</p> <p><i>Limited analysis</i> AN – candidate shows one link in the chain of analysis.</p> <p><i>Developed analysis</i> DEV – candidate shows two or more links in the chain of analysis.</p> <ul style="list-style-type: none"> allows a business to increase profits – reduce costs by using external resources can improve quality, efficiency or productivity – using experienced providers reduce risks or liabilities – share with other firms compromise the quality and consistency of FF's products – lose customers expose FF to more risks and uncertainties – such as reliability, delivery delays, contractual disputes etc increase costs – may not be able to afford internal growth increased market share – growth can help FF capture a larger share of the market, enhancing its competitive position economies of scale – as businesses grow, they can achieve economies of scale, reducing the cost per unit of production and increasing profitability diversification – growth often allows businesses to diversify their product lines or enter new markets, spreading risk and creating new sources of revenue resource constraints – rapid growth can strain an organisation's resources, including finances, personnel, and infrastructure quality control – maintaining product or service quality can be more challenging as the business grows <p>AO4 Evaluation</p> <p><i>Limited evaluation</i> EVAL – unsupported judgement and/or a weak attempt at evaluative comment</p> <p><i>Developed evaluation</i> E – supported judgement and/or reasonable evaluative comment</p> <p><i>Developed evaluation in context</i> EE – supported judgement in context and/or reasonable evaluative comment in context.</p> <ul style="list-style-type: none"> A recommendation whether growth is a suitable objective Elements that the recommendation could depend upon, including such as losing control over the quality and consistency of the products, compromising on the natural / organic approach A consideration of the implications for cost and ability to attract other firms Weighing up of the factors and their relative influence on growth. Depends upon the type of growth/how growth is achieved. FF should evaluate their strategic goals, market conditions, and internal capabilities to determine if growth is a suitable objective. <p>Note: Only accept judgements about growth but reward alternative objectives if growth discussed.</p> <p>Accept all valid responses.</p>	12
