Paper 1 Computer Systems

May/June 2025

1 hour 45 minutes

You must answer on the question paper.

No additional materials are needed.

INSTRUCTIONS

- Answer all questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do not write on any bar codes.
- Calculators must not be used in this paper.

INFORMATION

- The total mark for this paper is 75.
- The number of marks for each question or part question is shown in brackets [].
- No marks will be awarded for using brand names of software packages or hardware.

This document has 12 pages. Any blank pages are indicated.

1	The size of a file ca	n be measured usi	ing different data	storage units.
---	-----------------------	-------------------	--------------------	----------------

(a)	Tick	(✓) one box to show the smallest data storage unit.
	Α	byte
	В	gibibyte (GiB)
	С	kibibyte (KiB)
	D	nibble [1
(b)	Stat	te how many tebibytes (TiB) are equal to 2 pebibytes (PiB).
	Wor	king space
(c)	The	size of a file needs to be reduced.
	(i)	Give the name of the process that is used to reduce the size of a file.
	(ii)	One reason the size of a file may need reducing is so that it has a shorter transmission time.
		Give one other reason why the size of a file may need reducing.
۸ ما	othod	a store has a ticket evetem to allow sustamore to encole to a narrounal channer
		s store has a ticket system to allow customers to speak to a personal shopper.
		et displays a ticket number in hexadecimal, for example 11B.
(a)		ticket system has an output device that creates a paper ticket.
	lder	ntify an appropriate output device to produce the paper ticket.
		[1

(b)	Each ticket number is	stored as a bi	inary number i	in the	ticket machine	ڊ
١	ω_{I}	Lacif ticket number is	Stored as a bi	mary mumber i	III UIC	tionet macinin	∕.

(i)	Two ticket numbers are 14B and 97A.	
	Convert the two ticket numbers from hexadecimal to binary.	
	14B	
	97A	 [2]
	Working space	[4]
	g space	
/::\	Cive two reasons why the tighet number is displayed as heyedesimal instead of hine	
(ii)	Give two reasons why the ticket number is displayed as hexadecimal instead of bina	-
	1	
	2	
		[2]
The	e ticket numbers could also be represented as denary.	
(i)	Convert the two ticket numbers from hexadecimal to denary.	
	02C	
	10B	
<i>(</i> 11)		[2]
(ii)	Convert the two denary numbers into hexadecimal.	
	109	
	415	 [2]
	Working space

8||| 88||| 88||| 8|8| |88|

An image is converted to binary to be represented by a computer.

Complete the table with the missing terms and definition about representing an image.

Term	Definition
	This is the smallest component of an image.
resolution	
	This is the number of bits used to create each colour in an image.
	This is additional data that is stored with an image that can provide information such as the time and date the image was taken.

- 4 A restaurant has an electronic ordering system. The system allows customers to select the food they want to order. The data for the order is transmitted across their network to a computer in the restaurant kitchen.
 - (a) The data is sent using serial full-duplex data transmission.

()	data.	,		
	1			

Give two reasons why serial full-duplex is a suitable data transmission method for the

_			
2	 	 	

(ii) Give **one** improvement that would be made to the data transmission if parallel transmission is used instead of serial transmission.

(i)

DO NOT WRITE IN THIS MARGIN

(b) A checksum is used to check the data for errors after transmission.

(i)	Describe the pro	cess of the check	sum error detec	tion method.	
					[5]
(ii)	Identify one other data.	er error detection	method that co	uld be used to ch	neck for errors in the
					[1]
bro					ata for their order is uter in the restaurant
(i)	Tick (✓) one box	to show which it	em would not be	e included in a pad	cket's header.
	A destination a	address			
	B originator's	address			
	C packet num	per			
	D payload				[1]
(ii)	The packets of crestaurant kitche		be reordered w	hen they arrive at	the computer in the
	Explain why the	packets of data n	nay need to be re	eordered.	
					[2]

5 Data is processed by the central processing unit (CPU) in a computer that has a Von Neumann architecture.

6

(a) Complete the table with the missing terms and definitions about processing data.

Term	Definition			
current instruction register (CIR)				
	This is a processing unit within the CPU that can fetch, decode and execute instructions.			
	This is a list of all the commands that can be processed by the CPU.			
cache				
accumulator				
	[5]			
Identify the component in the C	PU that is responsible for decoding an instruction. [1]			
Explain how the clock speed can affect the performance of a CPU.				

(b)

(c)

6 Data can be encrypted using asymmetric encryption.

(a)	Complete the	paragraph	about	asymmetric	encryption.
-----	--------------	-----------	-------	------------	-------------

Use the terms from the list.

Some of the terms in the list will **not** be used. You may use a term more than once.

7

		and not will five by	accar roa may a		,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,		
algorit	hm	binary	cipher text	compression	error		
hardware		hexadecimal	meaningless	plain text	private		
	public	readable	transmissi	on unreadabl	е		
-	•	J.		of			
that scramble	es the		and	I turns it into			
A	A key is used to encrypt the data. This key cannot be used						
to decrypt the	e data. A	.	k	key is used to decrypt	the data. Any		
device is able	e to requ	est the		key, but only yo	our device		
knows the key. [8]							
Data can also	Data can also be encrypted using symmetric encryption.						
Give one re encryption.	ason wh	ny a person wou	ıld use asymmetr	ic encryption instead	l of symmetric		

(b)

7	A student's computer	has primary storage.	One example of	f primary	storage is	random	access
	memory (RAM).						

)	Ider	ntify one other example of primary storage.	[1]	
)	Ехр	lain why RAM is an example of primary storage and not secondary storage.		
			[3]	
)	The student is editing a large video file for a project and during this process the RAM becomes full. This makes the computer crash.			
	Des	scribe how virtual memory could be used in this process to stop the computer crashing		
			[3]	
)		computer uses solid-state (flash memory) storage.		
	(i)	Give two features of solid-state (flash memory) storage. 1		
		2		
			[2]	
	(ii)	Give two examples of solid-state (flash memory) storage.		
		1		
		2		

8 A robot is used to move car parts in a factory.

(a)	One characteristic of the robot is that it has a mechanical structure.	
	Give one other characteristic of a robot.	
		[1]
(b)	The robot has firmware.	
	State what is meant by firmware.	
		[1]
(c)	Interrupts are generated when the robot is operating in the factory.	
	Give two examples of interrupts that may be generated when the robot is in operation.	
	1	
	2	 [2]
(d)	Give two advantages to the workers in the factory of using robots to move the car parts.	
	1	
	2	
		[2]
(e)	The robots have the ability to automatically adapt their own processes.	
	State the name of the ability described.	
		[1]

- 9 Each employee in a finance company has a computer and an electronic account.
 - (a) Each computer has an operating system. One function of the operating system is to manage memory.

	Describe the role of the operating system in managing memory.			
		[3]		
(b)		finance company is concerned that a hacker may perform a brute-force attack to gain ess to an employee's account.		
	(i)	Describe how the hacker would perform the brute-force attack.		
		[2]		
	(ii)	Give three cyber security solutions that could be used to help prevent a brute-force attack from being successful.		
		1		
		2		
		3[3]		
(c)	The	company uses a digital currency to purchase a new car.		
	(i)	State what is meant by a digital currency.		
		[1]		
	(ii)	The digital currency uses a process that involves a digital ledger. The ledger has time stamped transactions that cannot be altered.		
		Give the name of this process.
