

## Cambridge International AS & A Level

BUSINESS
Paper 2 Data Response
MARK SCHEME
Maximum Mark: 60

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2022 series for most Cambridge IGCSE, Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

© UCLES 2022 [Turn over

## **Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

#### GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

#### **GENERIC MARKING PRINCIPLE 2:**

Marks awarded are always whole marks (not half marks, or other fractions).

#### **GENERIC MARKING PRINCIPLE 3:**

#### Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit
  is given for valid answers which go beyond the scope of the syllabus and mark scheme,
  referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these
  features are specifically assessed by the question as indicated by the mark scheme. The
  meaning, however, should be unambiguous.

## **GENERIC MARKING PRINCIPLE 4:**

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

## **GENERIC MARKING PRINCIPLE 5:**

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

#### GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

# Social Science-Specific Marking Principles (for point-based marking)

## 1 Components using point-based marking:

Point marking is often used to reward knowledge, understanding and application of skills.
 We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

#### From this it follows that we:

- **a** DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- **b** DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- **c** DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require *n* reasons (e.g. State two reasons ...).
- **d** DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- **e** DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- **f** DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- **g** DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)

#### 2 Presentation of mark scheme:

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

### 3 Calculation questions:

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

© UCLES 2022 Page 3 of 22

## 4 Annotation:

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

© UCLES 2022 Page 4 of 22

#### PREPARATION FOR MARKING

- 1 Make sure that you have completed the relevant training and have access to the *RM Assessor Guide*.
- 2 Make sure that you have read and understand the question paper, which you can download from <a href="https://support.rm.com/ca">https://support.rm.com/ca</a>
- 3 Log in to RM Assessor then mark and submit the required number of practice and standardisation scripts. You will need to mark the standardisation scripts to the required accuracy in order to be approved for marking live scripts. You may be asked to re-mark them, or to mark a second sample, if you do not meet the required accuracy on your first attempt.

#### **MARKING PROCESS**

- 1 Mark strictly to the FINAL mark scheme, applying the criteria consistently and the general marking principles outlined on the previous page.
- 2 If you are in doubt about applying the mark scheme, consult your Team Leader.
- Mark at a steady rate through the marking period. Do not rush, and do not leave too much until the end. If you anticipate a problem in meeting the deadline, contact your Team Leader immediately and the Examiners' Helpdesk.
- 4 Examiners will prepare a brief report on the performance of candidates to send to their Team Leader via email by the end of the marking period. The Examiner should note strengths seen in answers and common errors or weaknesses. Constructive comments on the question paper, mark scheme or procedures are also appreciated.

#### MARKING SPECIFICS

#### Crossed out work

- 1 All of a candidate's answers, crossed out or not, optional or not, must be marked.
- 2 The only response not to be marked is one that has been crossed out and <u>replaced</u> by another response for that exact same question.
- 3 Consequently, if a candidate has crossed out their response to an <u>optional</u> question and gone on to answer a <u>different</u> optional question then <u>both</u> attempts must be marked. The higher mark will be awarded by the system according to the rubric.

## 0 (zero) marks or NR (no response)

- Award **NR** if there is <u>nothing</u> at all written in answer to that question (often the case for optional questions).
- 2 Award **NR** if there is a <u>comment</u> which is <u>not an attempt</u> at the question (e.g. 'can't do it' or 'don't know' etc.)
- 3 Award **NR** if there is a <u>symbol</u> which is <u>not an attempt</u> at the question, such as a dash or question mark.
- 4 Award **0** (zero) if there is any <u>attempt</u> at the question which <u>does not score marks</u>. This includes copying the question onto an Answer Booklet.

#### Annotation

- 1 Every <u>question</u> must have <u>at least one</u> annotation e.g. <NAQ> if it is an NR and <X> or <seen> if 0 marks are awarded.
- 2 Every page of a script must have at least one annotation e.g. <BP> for a blank page.

Question	Answer					
2(d)	Evaluate the possible impact on MC from introducing process innovation.					
	Knowledge and Application (4 marks)	Marks	Analysis and Evaluation (7 marks)	Marks		
			A justified judgement on the importance of the impact	7		
			A judgement on the importance of the impact	6		
			An evaluation statement of the given arguments of an impact in context	5		
	Understanding of two effects of process innovation in context (*)	4	Developed analysis of two effects of process innovation	4		
	Understanding of one effect of process innovation in context	3	Developed analysis of one effect of process innovation in context	3		
	Knowledge of two effects of process innovation	2	Limited analysis of two effects of process innovation	2		
	Knowledge of one effects of process innovation	1	Limited analysis of one effect of process innovation	1		
	* Two effects can come from one impact  Note: Use of a process innovation (i.e. Capital expenditure is acceptable for Application without explicit reference to process innovation)					
	<ul> <li>Knowledge of effects/impacts of process innovation</li> <li>Increases/expands competitive advantage</li> <li>Develops performance by decreasing costs</li> <li>Enhances quality</li> <li>Makes the best use of competencies, skills and/or knowledge</li> <li>Builds a culture of continuous learning</li> </ul>					

© UCLES 2022 Page 20 of 22

Question	Answer	Marks
2(d)	<ul> <li>Application is likely to come from:</li> <li>Large plc with B2B model</li> <li>Mission statement is 'to be the world leader in delivering quality motorcycle components to our customers'</li> <li>Motorcycle component industry is very competitive and MC's customers expect high quality and a short lead time</li> <li>Good relationships with its suppliers ensure that JIT operates efficiently</li> <li>Liquidity management is very important</li> <li>automation of the production process</li> </ul>	
	<ul> <li>Analysis likely to come from: Impact should focus on MC and could be: positive</li> <li>Creates shorter lead times – which may increase orders due to high expectations</li> <li>Matches high customer quality expectations – increases sales revenue</li> <li>Links to mission statement (increased quality) – better dividends/marketing opportunity</li> <li>Reduced costs – eases cash flow pressures/acid test</li> <li>Increased market share as the industry and suppliers are competitive – better brand image</li> </ul>	
	<ul> <li>negative</li> <li>Image/reputational damage e.g. if redundancies happen – poor publicity</li> <li>Results in redundancies – increases costs</li> <li>Negative impact on morale – lower productivity</li> <li>Cost of automation – reduces profits/dividends</li> </ul>	
	<ul> <li>Other</li> <li>Process innovation may improve efficiency however this could result in redundancies – reducing the need for some employees – may be seen as not socially responsible (damage to image, want to be world leaders) and lead to lower sales - reduced revenue and profit</li> <li>Impact on employees and morale – fear of redundancies, change, could affect quality of work and conflict with the mission statement</li> <li>The industry and suppliers are competitive, so process innovation will reduce cost pressures and assist MC in being price competitive, however, other firms may also introduce new processes so less of an impact on MC</li> <li>Lower costs could allow MC to become more price competitive, increasing revenue (if PED is elastic), leading to higher profit and increasing share value, but other firms could retaliate and start a price</li> </ul>	
	<ul> <li>war resulting in losses for MC</li> <li>Evaluation is likely to come from: <ul> <li>An evaluation of the possible impact on MC of introducing process innovation</li> <li>A judgement in the outcomes of process innovation</li> <li>An evaluation on the level of argument</li> <li>What the judgement/evaluation may depend on: cost, reputation, customer reaction, supplier ability to deliver quantities of inventory, sources of finance, shareholder expectations</li> </ul> </li> </ul>
